Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Christopher Korff on 11-5-10.

The application has been amended as follows:

IN THE CLAIMS:

Cancel claim 45.

Claims 1-4, 8-19, 28, 32-38, 40, 42-44 and 54 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 46-53, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on 6-24-09 is hereby withdrawn**. In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be

Art Unit: 1784

subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Claims 1-4, 8-19, 28, 32-38, 40, 42-44 and 46-54 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art such as Branagan (Article: Wear-Resistant Amorphous and Nanocomposite Steel Coatings) teaches thermal sprayed coating layers on a substrate surface having minimal porosity (abs). Branagan further teaches that the thus formed coating is in a metallic glass state (conclusion). However the prior art of Branagan does not teach or suggest that the supercooled liquid temperature range ΔT_x is equal to or more than 30°C such as claimed.

.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JASON L. SAVAGE whose telephone number is (571)272-1542. The examiner can normally be reached on M-F 6:30-4:00.
